4.3.1 The Role of the Mentor & the Mentor Standard (NMC 2008)

These standards and criteria (referred to as the ‘NMC Mentor Standard’ are detailed specifically by NMC (2008; p23-24) and are listed verbatim below for ease of access. To review the full SLAIP (NMC 2008) standards please click on the link at the end of this page:

2.1 NMC mentor standard

An NMC mentor is a registrant who, following successful completion of an NMC approved mentor preparation programme – or comparable preparation that has been accredited by an AEI as meeting the NMC mentor requirements – has achieved the knowledge, skills and competence required to meet the defined outcomes.

A mentor is a mandatory requirement for pre-registration nursing and midwifery students.

Mentors who are assessing competence must have met the NMC outcomes defined in stage 2 of this standard, or be supervised by a mentor who has met these outcomes. Those who sign off proficiency must have met the additional criteria to be a sign-off mentor (see section 2.1.3). All midwife mentors must have met the additional criteria to be a sign-off mentor.

Once mentors have been entered on the local register (normally held by placement providers) they are subject to triennial review (see Roles to support learning and assessment in practice in the introduction). Mentors are responsible and accountable for:

- Organising and co-ordinating student learning activities in practice.
- Supervising students in learning situations and providing them with constructive feedback on their achievements.
- Setting and monitoring achievement of realistic learning objectives.
- Assessing total performance – including skills, attitudes and behaviours.
- Providing evidence as required by programme providers of student achievement or
lack of achievement.

- Liaising with others (e.g. mentors, sign-off mentors, practice facilitators, practice teachers, personal tutors, programme leaders) to provide feedback, identify any concerns about the student’s performance and agree action as appropriate.
- Providing evidence for, or acting as, sign-off mentors with regard to making decisions about achievement of proficiency at the end of a programme.

### 2.1.1 Criteria for supporting learning and assessing in practice – mentors

Nurses and midwives who intend to take on the role of mentor must fulfil the following criteria:

- Be registered in the same part or sub-part of the register as the student they are to assess and for the nurses’ part of the register be in the same field of practice (adult, mental health, learning disability or children’s). See Circular 26/2007 for further information (Annexe 3).
- Have developed their own knowledge, skills and competence beyond registration i.e. been registered for at least one year.
- Have successfully completed an NMC approved mentor preparation programme (or a comparable programme which has been accredited by an AEI as meeting the NMC mentor requirements).
- Have the ability to select, support and assess a range of learning opportunities in their area of practice for students undertaking NMC approved programmes.
- Be able to support learning in an interprofessional environment – selecting and supporting a range of learning opportunities for students from other professions.
- Have the ability to contribute to the assessment of other professionals under the supervision of an experienced assessor from that profession.
- Be able to make judgements about competence/proficiency of NMC students on the same part of the register, and in the same field of practice, and be accountable for
such decisions.

- Be able to support other nurses and midwives in meeting CPD needs in accordance with The Code: Professional standards of practice and behaviour for nurses and midwives (NMC, 2015).
