Congratulations to all prize-winners and a warm thank you to our sponsors.

Welcome to the School of Engineering and Built Environment

The School of Engineering and Built Environment offers a comprehensive suite of programmes spanning Civil, Mechanical, Electronic and Environmental disciplines to Integrated Product Design and Software & Computer Systems Engineering including Digital Security. We also have industry leading courses in Construction

Management, Quantity Surveying and Property Management. In some of our Computing courses we combine traditional engineering skills with innovative and creative design skills to produce 3D capable software and games as well as functional yet stylish products.

We are especially proud of our industry links and we are fortunate to welcome a large number of part-time students each year who bring a great deal of practical experience. As a modern university we deliver innovative and exciting full and part-time academic programmes at undergraduate and postgraduate levels. Our well equipped facilities and high quality teaching staff ensure that students receive a stimulating practical and theoretical learning experience that is world class.

Our academic programmes are underpinned by our research which especially in the Built Environment is rated by the UK Research Assessment Exercise (RAE 2008) as 'world leading' and internationally excellent'. This year we are actively recruiting over twelve new staff who will bring exciting developments and new innovations, further strengthening our research position.

Our academic staff work closely with industry delivering a range of specialist consultancy and commercial research, as well as Continuing Professional Development (CPD). The School also delivers professional bespoke training through our company 'Academies'.

Professor Douglas Greenhalgh

BSc, PhD, CEng, CPhys, FInstP, FHEA
Executive Dean and Pro-Vice Chancellor,
School of Engineering and Built Environment

Kelvin Top Set
TOP-SET Award for Best Student
in Best Student in BSc (Hons) Network
and Systems Support
Winners: Atif Hussain

Turner & Townsend
Top Final Year Student Quantity
Surveying
BSc (Hons) Quantity Surveying
Winners: Lauren Meldrum

Prize for Top Honours Level Student
BSc (Hons) Property Management
Valuation
Winners: Samriti Sharma

KAR
Award for Overall Best
MSc Student in
Built Environment
Winners: Craig Bosworth

KAR
Award for Overall Best
BSc Student in
Built Environment
Winners: Lauren Meldrum

Welcome to Glasgow Caledonian University

It is a great privilege to welcome you to Glasgow Caledonian University and the Student Awards Event for the School of Engineering and Built Environment.

A globally networked University, GCU is committed to providing educational opportunity to talented students from a range of

backgrounds and delivering research with a practical benefit to society. Our student awards events are always a source of pride for staff and students alike and celebrate the efforts of each and every member of our University community including those who have excelled.

Central to the education we provide at the University is the support provided by Professional Bodies who accredit our courses and the input from our colleagues in business who help us co-create our curriculum ensuring our teaching is relevant in the modern day world and we are once again grateful for their considerable contributions throughout the year. These contributions come in a variety of forms: the provision of numerous student prizes; valuable guidance on curriculum design; engagement in joint research; consultancy and knowledge transfer activities, and sometimes as a critical friend offering advice and support.

I would also like to take this opportunity to thank the staff of the School who have once again shown great skill, commitment and enthusiasm throughout the year in guiding students to achieve their full potential.

I do hope that you will enjoy celebrating the success of our students.

Professor Pamela Gillies
Principal and Vice-Chancellor

Our commitment to
excellence is underpinned
by our industrial
partnerships.

Prize giving ceremony

- 5.30 Drinks reception
- 6.00 Welcome
- 6.20 Ceremony
- 7.30 Hot meal
- 8.30 After dinner speech
- 9.00 Drinks

Anglaise and seasonal Berries
or Scottish cheeseboard selection with Oatcakes
(Morangie Brie, Goats Cheese, Smoked Ayrshire,
Cairnmore Ewes Milk, Dunsyre Blue)

Fairtrade Tea & Coffee

Home made Fudge

After dinner speaker

Matt Stewart is the founder and Managing Director of entrepreneur me, a company he started in Glasgow 12 years ago.

He is proud to say he started the business with nothing (well nearly nothing he had an idea and a burning desire to make a difference) he believed then and does now that having entrepreneurial skills and mindset can solve many of Scotland's social challenges.

Being entrepreneurial means accepting self responsibility, setting your sights high, having great self belief and being able to spot an opportunity.

The Mission of entrepreneur me is "Encouraging Entrepreneurship for Social Change"

Matt has expanded the business into Northern Ireland and England with this year over 30,000 people participating in his entrepreneur workshops.

A positive thinker, Matt is a Glasgow boy doing good – he has a keen interest in Scottish Entrepreneurial History and in particular the life of Andrew Carnegie.

Ladies and Gentleman... Matt Stewart

Prize giving ceremony

Khalid Abdulrhamin Awards

Khalid Abdulrhamin is the founder, owner, chairman and CCEO of Cebarco a major Bahraini construction company responsible for iconic projects such as the Yas-Marina Formula 1 circuit in Abu-Dhabi. A graduate of GCU he has pledged a quarter of a million pounds over five years to support scholarships and international placements for built

environment students at the university. He set up the KAR fund 'to give something back to the university and help benefit future leaders of the construction industry'.

In addition to the KAR awards presented at tonight's prize giving ceremony the fund has supported a range of opportunities for students including study trips to the Gulf Region, North America and Europe and student placements across Europe and as far afield as India and New Zealand."
