GCU has offered labs on campus as part of the schools programme since the Glasgow Science Festival began.

Labs on campus offers primary, secondary pupils, teachers and home school pupils and their parents access to the latest scientific equipment, research and teaching facilities and the expertise of GCU staff and students to share knowledge and inspire young people about STEM and university. Our GCU Labs on Campus offering for 2019 includes Vision Matters, The Human Body in Action, Virtual Reality Driving Simulator, Human Gait Analysis, Renewable Energy Physics, Thin Layer Chromatography and Careers in Chemistry, Computing Games Design and Coding.
